

## Get a 2.5% loan for heat pump

### Guidelines

- Conversions to electric heat from fossil fuel heating system are eligible.
- Upgrade existing heat pump to a new heat pump.
- For air source heat pumps, back-up fuel source can be either electric or fossil fuel.
- Must be 14.0 Seasonal Energy Efficiency Ratio (SEER) and 8.2 HSPF or higher.
- Programmable thermostats, associated wiring and ductwork are eligible.
- Homes built within the last 5 years are not eligible for the loan, but are eligible for an incentive.
- Homeowner must choose between incentive and loan.

The low interest loan is available through your local bank.
