

Guidelines for replacing mercury vapor light with high pressure sodium

1. All replaced or retrofitted lighting equipment must be permanently installed.
2. Area lighting may be metered or unmetered.
3. Area lighting may be customer-owned or Cornhusker Power owned (rental/lease).
4. An incentive will be given to customer whether the light is customer owned or Cornhusker Power owned.
5. If customer owns light and replaces with Cornhusker owned light, customer is eligible for rebate.
5. An incentive will be provided to the person responsible for the utility account after the equipment is installed and operating. No incentive(s) will be paid without the completion of the application form. The application form must then be signed by the owner and installing contractor (if applicable). The completed application form will then be submitted to Cornhusker Power for processing.
6. If customer owned, sales receipt(s) or invoice(s) itemizing the new equipment and indicating the size, type, make, model, purchase date, and vendor must accompany each energy efficiency incentive application.
7. The incentive payment will come directly from Cornhusker Power.
